Lazors game hints

Lazors is really a fantastic physics puzzle game to test your brain to your limits. Guide laser beams around each room using reflective blocks, glass tiles and prisms. All you have to do is light up every black spot and progress to the next level. Sometimes this is made easier, so the tips are exhausted, take a quick look at our answers! Open the Mac App Store to buy and download apps. Lazors lasers and mirrors stop in a puzzle game, offering face levels, until difficult challenges are easy distractions. + 280 levels + Intuitive game + Hint system + Universal: iPod, iPhone and iPad + Game Center achievements+Hamle blocks, project lasers, hit all targets! October 14, 2015 Version 2.4.0 v2.4.0- New blocks: Mirror+ and Stop+ 50 new levels of difficulties and strategies to varying degrees of puzzle lots. It can be eaten quite quickly depending on how often you play. For each puzzle to finish, get rewarded with a hint (showing the correct placement of one of the blocks) this game is amazing that you can choose to use it on another puzzle - I have played all levels 2 (it's going to be three) times and continue to challenge and entertain. If you have some time to kill or just need a break to refresh what you are doing without the need for so much attention and concentration you can't focus on where you are back to a big diversion. This is a great game. Lots levels with increasing difficulty! The puzzles are interesting and challenging. In-app purchases are not required to play at all, but you can buy tips if you're stuck (and the game also provides some free tips). Well done, Pyrosfer!
